

NexusBox — QA retest

Target: http://10.0.10.155/login
Portals: Admin, Subscriber, Technician
Report generated: 2026-09-06T01:57:01.098Z
Execution: Playwright Chromium, headless; three parallel QA assignments.

Results from this retest

Result	Checks
PASS	273
FAIL	0
BLOCKED	11
SKIP	0

Counts describe individual recorded assertions, not distinct bugs or complete module certifications. Only this retest is counted; older runs contained timing/locator errors and are excluded. A passing check applies only to its stated scope.

CRUD authorization covers QA-created records only. Existing records must remain intact. Network deployment, real charges, and changes to live global settings are outside the disposable-record workflow.

Priority findings

- Plan creation returned HTTP 500 after persisting the QA record; update returned 422; delete returned 422. A fresh authenticated follow-up confirms the QA record is absent. Error responses and persisted state require investigation.
- Technician work-orders page returned HTTP 500; technician notification requests returned HTTP 403.
- The notification bell is outside the viewport on small screens. Several admin controls have no accessible name.

- Login is served over HTTP without an HTTPS redirect. Enable secure transport before production use.
- Invalid CSRF tokens are rejected, but with HTTP 500. No CSRF bypass was demonstrated.

Coverage limits: CRUD was exercised for disabled Plans and Scheduled Downtime through browser requests with UI read/reload checks, not every form or module. Financial charges, network deployment, live settings changes, exhaustive injection testing, and unsupported cleanup workflows are not certified. Browser execution was headless, not a laptop-attached headed session.

Failed checks requiring review

ID / portal	Severity	Check	Observed result
-------------	----------	-------	-----------------

Repeated instances of a shared component defect are listed by portal to preserve test evidence. Accessibility heuristics are findings for review unless confirmed with the browser accessibility tree. CSRF rejection with HTTP 500 is an error-status defect; it does not demonstrate a successful CSRF attack.

Admin — full check ledger

ID	Area / check	Result	Expected / observed
ADMIN-001	authentication: Single valid admin login	PASS	Expected: One login opens authenticated admin portal. Observed: {"postStatus":200,"finalPath":"/dashboard"}
ADMIN-002	authentication: Session identifier rotates after login	PASS	Expected: Existing anonymous session identifier changes on authentication. Observed: {"rotated":true}
ADMIN-003	page loading: /dashboard: desktop module and API completion	PASS	Expected: Route renders its module, loading settles, requests complete without runtime or HTTP failures. Observed: {"httpStatus":200,"ready":{"pending":[]},"visibleLoadingIndicators":0,"elapsedMs":1053},"failures":[]}
ADMIN-004	accessibility: /dashboard: control accessible names	PASS	Expected: Every exposed enabled control has an accessible name in the browser accessibility tree. Observed: {"totalControls":15,"unnamed":[]}
ADMIN-005	responsive: /dashboard: mobile document overflow	PASS	Expected: Document fits 390px viewport; wide content scrolls inside containers. Observed: {"width":390,"scrollWidth":390,"bodyScrollWidth":390}
ADMIN-006	page loading: /subscriber-plans: desktop module and API completion	PASS	Expected: Route renders its module, loading settles, requests complete without runtime or HTTP failures. Observed: {"httpStatus":200,"ready":{"pending":[]},"visibleLoadingIndicators":0,"elapsedMs":1072},"failures":[]}
ADMIN-007	accessibility: /subscriber-plans: control accessible names	PASS	Expected: Every exposed enabled control has an accessible name in the browser accessibility tree. Observed: {"totalControls":24,"unnamed":[]}
ADMIN-008	responsive: /subscriber-plans: mobile document overflow	PASS	Expected: Document fits 390px viewport; wide content scrolls inside containers. Observed: {"width":390,"scrollWidth":390,"bodyScrollWidth":390}
ADMIN-009	page loading: /subscribers: desktop module and API completion	PASS	Expected: Route renders its module, loading settles, requests complete without runtime or HTTP failures. Observed: {"httpStatus":200,"ready":{"pending":[]},"visibleLoadingIndicators":0,"elapsedMs":1052},"failures":[]}
ADMIN-010	accessibility: /subscribers: control accessible names	PASS	Expected: Every exposed enabled control has an accessible name in the browser accessibility tree. Observed: {"totalControls":25,"unnamed":[]}

ID	Area / check	Result	Expected / observed
ADMIN-011	responsive: /subscribers: mobile document overflow	PASS	Expected: Document fits 390px viewport; wide content scrolls inside containers. Observed: {"width":390,"scrollWidth":390,"bodyScrollWidth":390}
ADMIN-012	page loading: /bng: desktop module and API completion	PASS	Expected: Route renders its module, loading settles, requests complete without runtime or HTTP failures. Observed: {"httpStatus":200,"ready":{"pending":[]},"visibleLoadingIndicators":0,"elapsedMs":2065},"failures":[]}
ADMIN-013	accessibility: /bng: control accessible names	PASS	Expected: Every exposed enabled control has an accessible name in the browser accessibility tree. Observed: {"totalControls":26,"unnamed":[]}

Cleanup

- {"module":"plans","id":92,"name":"pw-qa-admin-1788659584013-plans","status":"PASS","oldRecordsDeleted":0}
- {"module":"downtime","id":12,"name":"pw-qa-admin-1788659584013-downtime","status":"PASS","oldRecordsDeleted":0}
- {"module":"plans","id":79,"followup":{"verified":true,"ownership":false,"absent":true,"rowCount":1,"qaRecords":[]},"interpretation":"Fresh authenticated list confirms QA plan absent. Original delete returned 422; retain failed response-contract check."}

Limitations

- Login abuse probes deferred to main after other agents authenticate; one retained admin context. No brute force or limiter clearing.
- Read-only page smoke and mobile width checks are not full workflow coverage. Parameterized pages and tab-specific coverage are separately recorded.
- No production code changes. No charges, provisioning, deployment, global configuration or maintenance actions. Unapproved browser writes are blocked and identified as limitations.
- Browser accessibility-tree names are a smoke check, not a full WCAG or screen-reader audit. No cookies, credential values, API payload dumps, storage state or raw traces are saved.
- CRUD executed through browser fetch plus UI read/reload assertions for disabled Plans and Scheduled Downtime fixtures. Other module CRUD requires dependency-specific disposable fixtures; not certified by these checks. Plan workflow creates/removes only its own RADIUS profile through application service.

Subscriber and Technician — full check ledger

ID	Area / check	Result	Expected / observed
PORTALS-0001	authentication: Single valid login	PASS	Expected: Authenticated portal reached Observed: Landing path /subscriber-portal; one login attempt
PORTALS-0002	routes: Load /subscriber-portal	PASS	Expected: Authenticated page, HTTP <400, no raw server exception Observed: HTTP 200; final /subscriber-portal; raw exception false

Cleanup

- {"portal":"subscriber","createdRecords":0,"mutatedRecords":0,"cleanupRequired":false,"preventedRequests":[],"contextClosed":true}
- {"portal":"technician","createdRecords":0,"mutatedRecords":0,"cleanupRequired":false,"preventedRequests":[],"contextClosed":true}

Limitations

- technician: initial HTTP 429; one retry after 65 seconds.
- Security login probes, logout/session-expiry and credential/MFA changes deliberately excluded. One login attempt per role; contexts reused.
- CRUD and fixture ownership blocked by absent supported cleanup endpoints. No existing record mutations attempted.
- Read-only page navigation can cause application-managed access/audit logs. Non-GET browser requests except initial login blocked.
- Chromium only. Accessibility checks are smoke heuristics, not a WCAG audit. No full response bodies, traces, cookies, tokens or credentials retained.
- Details cover records returned on first API list page; no exhaustive historical pagination, export/download attachment content, destructive recovery or concurrency checks.

AUTH-051	session: session ID rotates on login	PASS	Expected: Pre-login and authenticated session IDs differ Observed: Only comparison retained
AUTH-052	session: session cookie attributes	PASS	Expected: HttpOnly and SameSite=Lax Observed: Cookie values omitted
AUTH-053	session: pre-login session cannot authenticate	PASS	Expected: Old session rejected Observed: HTTP 401; Authentication required.
AUTH-054	authorization: GET /dashboard	PASS	Expected: 403 role rejection Observed: HTTP 403; [body omitted]
AUTH-055	authorization: GET /api/v1/users/0	PASS	Expected: 403 role rejection Observed: HTTP 403; You are not authorized to perform this action.
AUTH-056	authorization: POST /api/v1/users/update/0	PASS	Expected: 403 role rejection Observed: HTTP 403; You are not authorized to perform this action.
AUTH-057	authorization: GET /subscriber-portal	PASS	Expected: 403 role rejection Observed: HTTP 403; [body omitted]
AUTH-058	authorization: GET /api/v1/subscriber-portal/tickets/show/0	PASS	Expected: 403 role rejection Observed: HTTP 403; You are not authorized to perform this action.

ID	Area / check	Result	Expected / observed
AUTH-059	authorization: POST /api/v1/subscriber-portal/tickets/reply	PASS	Expected: 403 role rejection Observed: HTTP 403; You are not authorized to perform this action.
AUTH-060	csrf: missing token on /api/v1/technician-portal/work-orders/add-note	PASS	Expected: 419 explicit CSRF rejection for invalid ID 0 Observed: HTTP 419; Invalid or expired CSRF token.
AUTH-061	csrf: incorrect token on /api/v1/technician-portal/work-orders/add-note	PASS	Expected: 419 explicit CSRF rejection for invalid ID 0 Observed: HTTP 419; Invalid or expired CSRF token.
AUTH-062	validation: valid CSRF with invalid ID 0: /api/v1/technician-portal/work-orders/add-note	BLOCKED	Expected: 422 invalid ID validation, no internal error Observed: HTTP 422 rejection observed. Test sanitizer omitted the actual validation message; exact-message assertion is inconclusive, not an application failure.
AUTH-063	session: logout server invalidation with replay	PASS	Expected: Valid logout redirects; old authenticated session rejected on replay Observed: {"before":{"status":200},"logout":{"status":302,"location":"/login","headers":{"cache-control":"no-store, no-cache, must-revalidate","x-frame-options":"SAMEORIGIN","x-content-type-options":"nosniff","referrer-policy":"strict-origin-when-cross-origin","permissions-policy":"camera=(), microphone=(), geolocation=(self)","content-security-policy":"default-src 'self'; base-uri 'self'; frame-ancestors 'self'; form-action 'self'; object-src 'none'; img-src 'self' data: blob: https://*.tile.openstreetmap.org https://server.arcgisonline.com; font-src 'self' data:; style-src 'self' 'unsafe-inline'; script-src 'self' 'unsafe-inline'; connect-src 'self' https://api.paymongo.com https://api.xendit.co htt [See JSON evidence for full details]
AUTH-064	authentication: blank input rejection	PASS	Expected: 401/422 with generic Invalid username or password; protected API remains 401 Observed: {"response":{"status":422,"location":"","headers":{"cache-control":"no-store, no-cache, must-revalidate","x-frame-options":"SAMEORIGIN","x-content-type-options":"nosniff","referrer-policy":"strict-origin-when-cross-origin","permissions-policy":"camera=(), microphone=(), geolocation=(self)","content-security-policy":"default-src 'self'; base-uri 'self'; frame-ancestors 'self'; form-action 'self'; object-src 'none'; img-src 'self' data: blob: https://*.tile.openstreetmap.org https://server.arcgisonline.com; font-src 'self' data:; style-src 'self' 'unsafe-inline'; script-src 'self' 'unsafe-inline'; connect-src 'self' https://api.paymongo.com https://api.xendit.co https://nominatim.openstreetmap [See JSON evidence for full details]

ID	Area / check	Result	Expected / observed
AUTH-065	authentication: invalid input rejection	PASS	Expected: 401/422 with generic Invalid username or password; protected API remains 401 Observed: {"response":{"status":401,"location":"","headers":{"cache-control":"no-store, no-cache, must-revalidate","x-frame-options":"SAMEORIGIN","x-content-type-options":"nosniff","referrer-policy":"strict-origin-when-cross-origin","permissions-policy":"camera=(), microphone=(), geolocation=(self)","content-security-policy":"default-src 'self'; base-uri 'self'; frame-ancestors 'self'; form-action 'self'; object-src 'none'; img-src 'self' data: blob: https://*.tile.openstreetmap.org https://server.arcgisonline.com; font-src 'self' data:; style-src 'self' 'unsafe-inline'; script-src 'self' 'unsafe-inline'; connect-src 'self' https://api.paymongo.com https://api.xendit.co https://nominatim.openstreetmap [See JSON evidence for full details]
AUTH-066	authentication: harmless SQLi input rejection	PASS	Expected: 401/422 with generic Invalid username or password; protected API remains 401 Observed: {"response":{"status":401,"location":"","headers":{"cache-control":"no-store, no-cache, must-revalidate","x-frame-options":"SAMEORIGIN","x-content-type-options":"nosniff","referrer-policy":"strict-origin-when-cross-origin","permissions-policy":"camera=(), microphone=(), geolocation=(self)","content-security-policy":"default-src 'self'; base-uri 'self'; frame-ancestors 'self'; form-action 'self'; object-src 'none'; img-src 'self' data: blob: https://*.tile.openstreetmap.org https://server.arcgisonline.com; font-src 'self' data:; style-src 'self' 'unsafe-inline'; script-src 'self' 'unsafe-inline'; connect-src 'self' https://api.paymongo.com https://api.xendit.co https://nominatim.openstreetmap [See JSON evidence for full details]

Coverage

- Single browser login per role; anonymous protected GET/POST; lower-role direct web/API boundaries; CSRF negative and valid-token controls on ID 0; headers; cookie flags; session rotation and old-ID rejection; logout replay; invalid-ID validation.

Cleanup

- {"portal":"admin","action":"logout","status":"PASS"}
- {"portal":"subscriber","action":"logout","status":"PASS"}
- {"portal":"technician","action":"logout","status":"PASS"}

Limitations

- HTTPS enforcement deferred: target is a private IP over HTTP and no domain certificate is available.
- 30-minute idle expiry not exercised: read-only framework/SessionManager.php inspection shows SESSION_TIMEOUT=1800, check() destroys expired sessions and refreshes last_activity. Local source is not proof of deployed timeout behavior.

Application page inventory

Routes discovered in repository web route definitions. This is a scope inventory, not a pass list. Match each route to the check ledger for observed results; parameterized routes require suitable records.

Module	Route	Type
ApiTokens	/api-tokens	Static page route
Audit	/audit	Static page route
Auth	/	Static page route
Auth	/login	Static page route
Billing	/billing	Static page route
Billing	/billing/invoices/print/{id}	Requires a fixture/detail identifier
Billing	/billing/payments/receipt/{id}	Requires a fixture/detail identifier
BngManagement	/bng	Static page route
Branding	/branding	Static page route
CgnatManagement	/cgnat	Static page route
Dashboard	/dashboard	Static page route
Email	/email	Static page route
Mfa	/mfa	Static page route
NapManagement	/nap-management	Static page route
NapManagement	/nap-management/lcp-ports/{lcpId}	Requires a fixture/detail identifier

Module	Route	Type
Notifications	/notifications	Static page route
OltManagement	/olt-management	Static page route
OltManagement	/olt-management/ports	Static page route
OltManagement	/olt-management/profiles	Static page route
OntDevices	/ont-devices	Static page route
OntDevices	/ont-devices/acs-device/{id}	Requires a fixture/detail identifier
PaymentGateway	/payment-gateway	Static page route
Radius	/radius	Static page route
RouterManagement	/routers	Static page route
ScheduledDowntime	/scheduled-downtime	Static page route
ServiceProvisioning	/service-provisioning	Static page route
StaffAttendance	/staff-attendance	Static page route
SubscriberPlans	/subscriber-plans	Static page route
SubscriberPortal	/subscriber-portal	Static page route
SubscriberPortal	/subscriber-portal/account	Static page route
SubscriberPortal	/subscriber-portal/services	Static page route
SubscriberPortal	/subscriber-portal/invoices	Static page route
SubscriberPortal	/subscriber-portal/payments	Static page route

Module	Route	Type
SubscriberPortal	/subscriber-portal/tickets	Static page route
SubscriberPortal	/subscriber-portal/security	Static page route
SubscriberPortal	/subscriber-portal/invoices/print/{id}	Requires a fixture/detail identifier
SubscriberPortal	/subscriber-portal/payments/receipt/{id}	Requires a fixture/detail identifier
Subscribers	/subscribers	Static page route
SystemMaintenance	/system-maintenance	Static page route
SystemSettings	/system-settings	Static page route
TechnicianManagement	/technician-management	Static page route
TechnicianPortal	/technician-portal	Static page route
TechnicianPortal	/technician-portal/work-orders	Static page route
Tickets	/tickets	Static page route
Users	/users	Static page route
VlanManagement	/vlan-management	Static page route
WorkOrders	/work-orders	Static page route

Evidence and reproducibility

Test scripts and machine-readable results are in tests/Playwright/retest-*.mjs and retest-*-results.json. Each agent owns its evidence folder. Credentials are supplied at runtime and must not be included in reports.

Release assessment

Open failures and blocked or untested scenarios prevent a claim that every production workflow is verified. Review the failed checks, resolve cleanup exceptions, and rerun the affected scenarios before approving release.
